

Top Scoring Medicare-Medicaid Plans on Overall Rating of Health Plan: A Snapshot from the 2023 CAHPS Survey

Under the Medicare-Medicaid Financial Alignment Initiative, the Centers for Medicare & Medicaid Services (CMS) measures consumer experience in multiple ways, including through beneficiary surveys such as the Consumer Assessment of Healthcare Providers and Systems (CAHPS). Under the capitated financial alignment model, Medicare-Medicaid Plans (MMPs) are required to annually conduct the Medicare Advantage Prescription Drug (MA-PD) CAHPS survey, which measures important aspects of an individual's health care experience including the accessibility to and quality of services.

In order to report MA-PD CAHPS in a given year, health plans, including MMPs, must have a minimum of 600 enrollees as of July 1st of the preceding calendar year. In early 2023, surveys were sent to a sample of MMP enrollees with at least six months of continuous enrollment. Enrollees were asked to evaluate their health care experience over the previous six months. As a result, 28 MMPs participating in eight capitated model demonstrations were able to report CAHPS during the 2023 reporting cycle.

As part of the MA-PD CAHPS survey, respondents are asked to rate their health plan on a scale from 0 to 10, where 0 is the worst health plan possible and 10 is the best health plan possible. The table below presents the scores for the top ten performing MMPs. The scores below are the percentage of the best possible score each MMP earned. CMS rounds to the nearest integer in the public presentation of this data; the order presented is based on decimal points not shown.

MMP Name (Contract Number)	State	Score (out of 100)
Neighborhood Health Plan of RI (H9576)	RI	91
