MACPAC Releases New Report on Methodological Approaches for Analyzing Medicaid LTSS Data

The Medicaid and CHIP Payment and Access Commission (MACPAC) recently released a report on the results of a comparative review of methodological approaches for analyzing Medicaid long-term services and supports (LTSS) data. LTSS covers a wide range of non-medical services and supplements for those who need assistance with daily activities. And while research does exist on use and spending on Medicaid LTSS, there is little research on LTSS demographics. This report focuses on four analytic frameworks:

1. CMS LTSS expenditure and user reports
2. HCBS taxonomy work sponsored by the Assistant Secretary for Planning and Evaluation
3. DQ Atlas HCBS methodology brief
4. HCBS analyses performed by KFF

This report can be found on the [MACPAC website](#).
